

CONTENTS

ACKNOWLEDGEMENTS	ii
ACRONYMS	iii
CHAPTER 1: THE MACROENVIRONMENT AFFECTING THE BIODIVERSITY CONSERVATION SECTOR	1
Introduction	2
Human capital theory and context.....	4
The macroenvironment	20
Knowledge workers, retention and transformation	53
Conclusion	59
References	59
CHAPTER 2: NATURE AND DYNAMICS OF EMPLOYMENT IN THE BIODIVERSITY CONSERVATION SECTOR	65
Scope, nature and limitations of data.....	69
Main findings.....	75
Comparative results: occupational gap analysis	103
Implications and recommendations.....	116
References	124
Appendix A: Occupational role clusters in the biodiversity conservation sector	126
CHAPTER 3: AFFECTING LEARNER STUDY AND CAREER CHOICES – LESSONS FROM THE YOUTH IN SCIENCE STRATEGY	130
Introduction	131
The South African educational landscape.....	132
Literature supporting out-of-school interventions	138
Description of the YiSS interventions.....	142
HSRC evaluations of the YiSS interventions	147
Methodology used in the YiSS tracking studies	147
Key indicators in a successful intervention	148
Implications of YiSS model	154
Biodiversity-related camps for students	155

Biodiversity-related camps for teachers	156
Support for the national curriculum on sections related to biodiversity	157
National science week as a platform to promote biodiversity	158
Media	158
Conclusions	159
References	159

CHAPTER 4: SIZE AND NATURE OF THE HIGHER EDUCATION SUPPLY TO THE BIODIVERSITY SECTOR.....162

Introduction	163
Scope, nature and limitations of data.....	163
Findings	166
Conclusion	199
References	201
Appendix B: Trends in the supply of graduates in specific fields of study in biodiversity qualifications for each He institution	204

CHAPTER 5: SCARCE SKILLS AND THE NATURE OF TRAINING PROVISION IN THE BIODIVERSITY CONSERVATION SECTOR.....230

Introduction	231
Background to scarce skills	231
The sector environment: implications for scarce skills	242
Factors influencing skills and capacity needs	243
A preliminary assessment of scarce skills needs.....	264
Nature of and expenditure on training provision	273
Nature of training provision	277
Provincial government	279
Local government	286
NGOs and NPOs	289
Parastatals and research institutes	291
Private sector	296
Higher education institutions.....	297
Implications of training provision.....	297

Conclusion	299
References	299

CHAPTER 6: DYNAMICS OF PROFESSIONAL AND MANAGERIAL PATHWAYS IN THE BIODIVERSITY CONSERVATION SECTOR.....	303
Introduction	304
Methodology	306
Professional pathways to biodiversity	311
Factors affecting the demand for skills.....	315
Factors affecting supply of skills	334
Career paths, retention and staff development	345
Implications	353
Conclusion	356
References	356

CHAPTER 7: RECOMMENDATIONS AND CONCLUSIONS	358
Introduction	359
Integrating the research into strategic processes	359
Professional development conceptual framework.....	362
Proposed HCD conceptual framework.....	366
Background to the recommendations	368
Recommendations	370
Challenges of data (quality and quantity)	418
Guidelines for a monitoring and evaluation framework	421
Conclusion	424
References	424
Appendix C: Occupational Gap Analysis	426

TABLES

Table 1.1: Overview of the definition of human capital in biodiversity and external policy frameworks	6
Table 1.2: Actual and estimated trends in expenditure on education (2003/04–2009/10) (rands)(%)	14
Table 1.3: Trends in the number of mathematics passes by province (2004–2006).....	15
Table 1.4: Trends in the average annual university endorsements (matric exemptions) by province (2004–2006)	15
Table 1.5: Audited and estimated expenditure for DEAT sectors (2005/06–2011/12) (rands) ('000)	37
Table 1.6: Audited and estimated expenditure for the biodiversity sectors (2005/06–2011/12).....	38
Table 1.7: Trends in expenditure in South African National Parks (SANParks) ..	39
Table 1.8: Trends in expenditure in SANParks on tourism, conservation and other programmes (2005/06–2011/12)	39
Table 1.9: National Qualifications Framework	43
Table 1.10: National Skills Certificates and Occupational Awards under the QCTO	46
Table 1.11: Overview of the OFO in the THETA conservation chamber at NQF 5 and higher.....	47
Table 1.12: Audit outcomes for national departments, national public entities and SETAs for 2004/05 and 2005/06.....	49
Table 1.13: Thomas and Ely's diversity paradigms as applied to South Africa ...	56
Table 2.1: Profile of the economically active population by population group and gender (%) (LFS Sept 2005)	69
Table 2.2: The biodiversity conservation sector profile, using 3-digit SIC code ..	71
Table 2.3: Professional, associate professional and managerial occupations in the biodiversity sector by 4-digit SOC	74
Table 2.4: Average annual number of employees in the biodiversity subsectors (2000–2007)	78
Table 2.5: Employment in the core occupations in the biodiversity subsectors (actual numbers) (2000–2007).....	80
Table 2.6: Employment trends (actual numbers) in core occupations in the public sector	81
Table 2.7: Employment trends in the public sector (2003/4–2008/9)	116

Table 2.8: Progress towards equity (2000–2007)	120
Table 3.1: Participation and performance patterns in Grade 12 students (2008)	136
Table 4.1: Fields of study in the biodiversity sector.....	165
Table 4.2: Average annual growth in graduations in biodiversity-related, secondary and other fields of study (2000–2007)	168
Table 4.3: Graduations (all levels) with majors in IT and Botany, IT and Zoology or IT and Geography (2007)	176
Table 4.4: Proportion of learnerships applicable to the biodiversity sector (2000–2007)	198
Table 5.1: Vacancy rates in the public biodiversity sector (2007/08)	250
Table 5.2: Changes in staff turnover and vacancy rates in DEAT (2007–2008)	250
Table 5.3: Preliminary assessment of potential skills needs (2009–2014)	253
Table 5.4: Province-based capacity needs in protected area management (Institute of Natural Resources, 2004, cited in DEAT, 2009b).....	272
Table 5.5: Training expenditure of government departments in the biodiversity- related sectors (2007/08)	274
Table 5.6: Estimated expenditure on training by DEAT (2005/06–2011/12)	276
Table 5.7: Explanatory key to identify participating organisations.....	279
Table 5.8: ProvGov1 number of training beneficiaries (2009/10).....	280
Table 5.9: ProvGov2 training beneficiaries	282
Table 5.10: ProvGov4 number of training beneficiaries (2007/08, 2008/09)	283
Table 5.11: LocGov2 number of training beneficiaries.....	287
Table 5.12: NGO/NPO2 number of training beneficiaries	290
Table 5.13: Para2 – Number of staff attending training.....	293
Table 5.14: Para4 – Number of training beneficiaries	295
Table 6.1: Description of sample and sample realisation.....	309
Table 6.2: Demographic profile of respondents	310
Table 7.1: Conceptual framework – biodiversity awareness in 30 primary schools in previously disadvantaged areas.....	367

FIGURES

Figure 1.1: The concept of “capital” over 230 years	18
Figure 1.2: Interface between biodiversity heritage, IKS and genomics.....	33
Figure 1.3: Expenditure on the environment (2000–2007).....	36
Figure 1.4: Distribution of learnership registration by NQF level (April 2000– March 2006).....	44
Figure 2.1: Average annual percentage of employees in the biodiversity subsectors (2000–2007)	77
Figure 2.2: Employment trends in core occupations in the biodiversity subsectors (actual numbers) (2000–2007).....	80
Figure 2.3: Employment trends in core occupations in public sector biodiversity (actual numbers) (2003/04 - 2008/09).....	82
Figure 2.4: Employment trends in core occupations in the provincial government biodiversity subsector (actual numbers) (2003/4 and 2008/9)	83
Figure 2.5: Average annual number and percentage employed in core occupations in the biodiversity subsectors (2000–2007).....	86
Figure 2.6: Employment profile in core occupations by public, private and NGO sectors (2000–2007)	88
Figure 2.7: Employment profile in core occupations by province (2000–2007) ...	89
Figure 2.8: Profile of the core managerial workforce in the biodiversity subsectors by population group and gender (2000–2007)	91
Figure 2.9: Comparison of the core managerial workforce by population group and gender (2000–2003; 2004–2007) (%)	92
Figure 2.10: Profile of core professionals and associate professionals (P&AP) in the biodiversity subsectors by population group and gender (2000–2007)	94
Figure 2.11: Comparisons of core professionals and associate professionals by population group and gender (2000–2003; 2004–2007)	96
Figure 2.12: Comparison of core managers, professionals and associate professionals (MP&AP) by population group and gender (2000–2003; 2004– 2007).....	97
Figure 2.13: Comparison of core managers, professionals and associate professionals (MP&AP) by population group and gender (2008/9)	97
Figure 2.14: Profile of core workforce by age group (2000–2007)	99
Figure 2.15: Qualification profile in the core occupations (%) (2000–2007).....	100
Figure 2.16: Changes in the qualification profile of core managers (2000–2003; 2004–2007).....	101

Figure 2.17: Changes in the qualification profile of core professionals (2000–2003; 2004–2007).....	102
Figure 2.18: Changes in the qualification profile of core associate professionals (2000–2003; 2004–2007).....	102
Figure 2.19: Comparison of the proportion of core and support occupations in participating organisations in the biodiversity sector (2008/09 and 2013/14)....	105
Figure 2.20: Distribution of occupations in participating organisations (2008/09–2013/14).....	108
Figure 2.21: Comparison the ratio of core managers to core professionals and core associate professionals in the biodiversity sector (2004–2007)	110
Figure 2.22: Distribution of core managers, professionals and associate professionals by race and gender (2008/09).....	112
Figure 2.23: Anticipated occupational growth in key biodiversity organisations (2008/9–20013/14).....	114
Figure 3.1: Number of Grade 12 and maths enrolments and maths passes at HG and SG level (1991–2007)	133
Figure 3.2: TIMSS 2003 mean mathematics scores for schools by ex-racial departments.....	134
Figure 3.3: Level of schooling of the general population (1999, 2001 and 2007).....	135
Figure 3.4: Post Grade 12 study intentions for 2007 camps	152
Figure 3.5: Post Grade 12 study choices for 2007 camps cohort	153
Figure 3.6: Distribution of courses registered for at tertiary institutions.....	153
Figure 4.1: Graduation trends in biodiversity-related, secondary and other fields of study (2000–2007)	168
Figure 4.2: Comparison of the proportion of qualifications in biodiversity-related fields of study to SET and higher education (2000–2007)	169
Figure 4.3: Levels of qualifications in biodiversity fields of study (2000–2007) .	170
Figure 4.4: Trends in the number of enrolments and graduations across all qualifications in biodiversity fields of study (2000–2007).....	171
Figure 4.5: Trends in the number of enrolments across all qualifications in the biodiversity fields of study by population group and gender (2000–2007)	172
Figure 4.6: Trends in number of graduates across all qualifications in the biodiversity fields of study by population group and gender (2000–2007)	173
Figure 4.7: Trends in undergraduate qualifications in biodiversity by population group and gender (2000–2007)	177
Figure 4.8: Trends in postgraduate qualifications in biodiversity (2000, 2007) .	178

Figure 4.9: Trends in honours level qualifications in biodiversity-related fields of study, general higher education, and SET (2000, 2007).....	182
Figure 4.10: Comparison of trends in master's degrees in biodiversity-related fields, general HE and SET (2000, 2007)	183
Figure 4.11: Comparison of trends in doctoral degrees in biodiversity-related fields, general HE and SET (2000, 2007)	184
Figure 4.12: Average number of doctoral degrees in biodiversity-related fields of study by tertiary institution and race (2000, 2007)	185
Figure 4.13: Trends in postgraduate qualifications in biodiversity by population group and gender (2000, 2007)	187
Figure 4.14: Enrolment, graduation and throughput trends in three-year degrees among black men and women (2000–2007).....	190
Figure 4.15: Enrolment, graduation and throughput trends in three-year degrees among white men and women (2000–2007).....	191
Figure 4.16: Enrolment, graduation and throughput trends in four-year degrees among black men and women (2000–2007).....	192
Figure 4.17: Enrolment, graduation and throughput trends in four-year degrees among white men and women (2000–2007).....	193
Figure 4.18: Enrolment, graduation and throughput trends in NDipls among black men and women (2000–2007)	195
