

Hi! I'm
Mpho Kapari

“Sometimes I’ll start a sentence, and I don’t even know where it’s going. I just hope I find it along the way.”
-Michael Scott

Second to murder, mystery documentaries, my go-to comforting TV show is The Office!

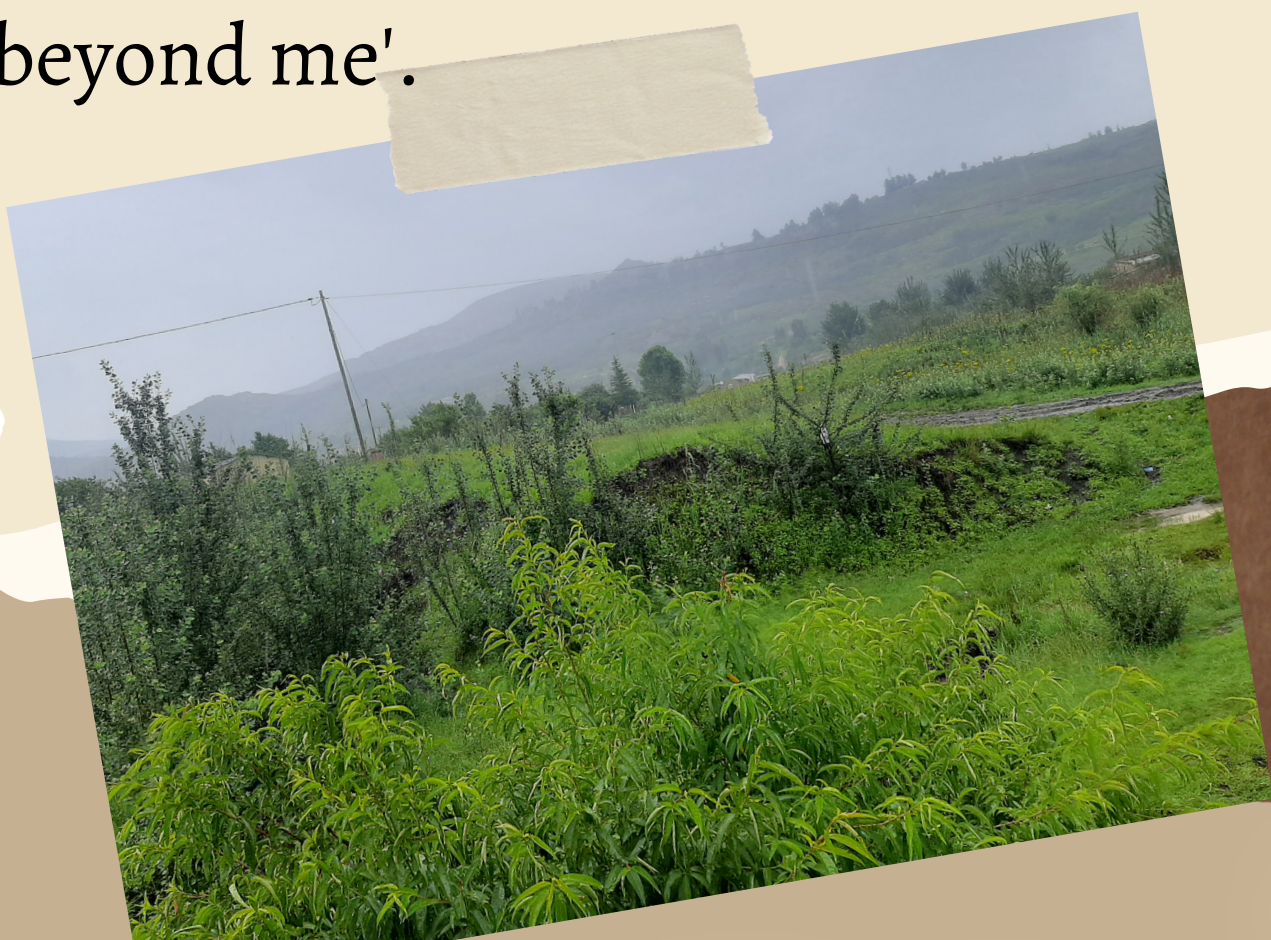

Fun Fact!

My quintessence?

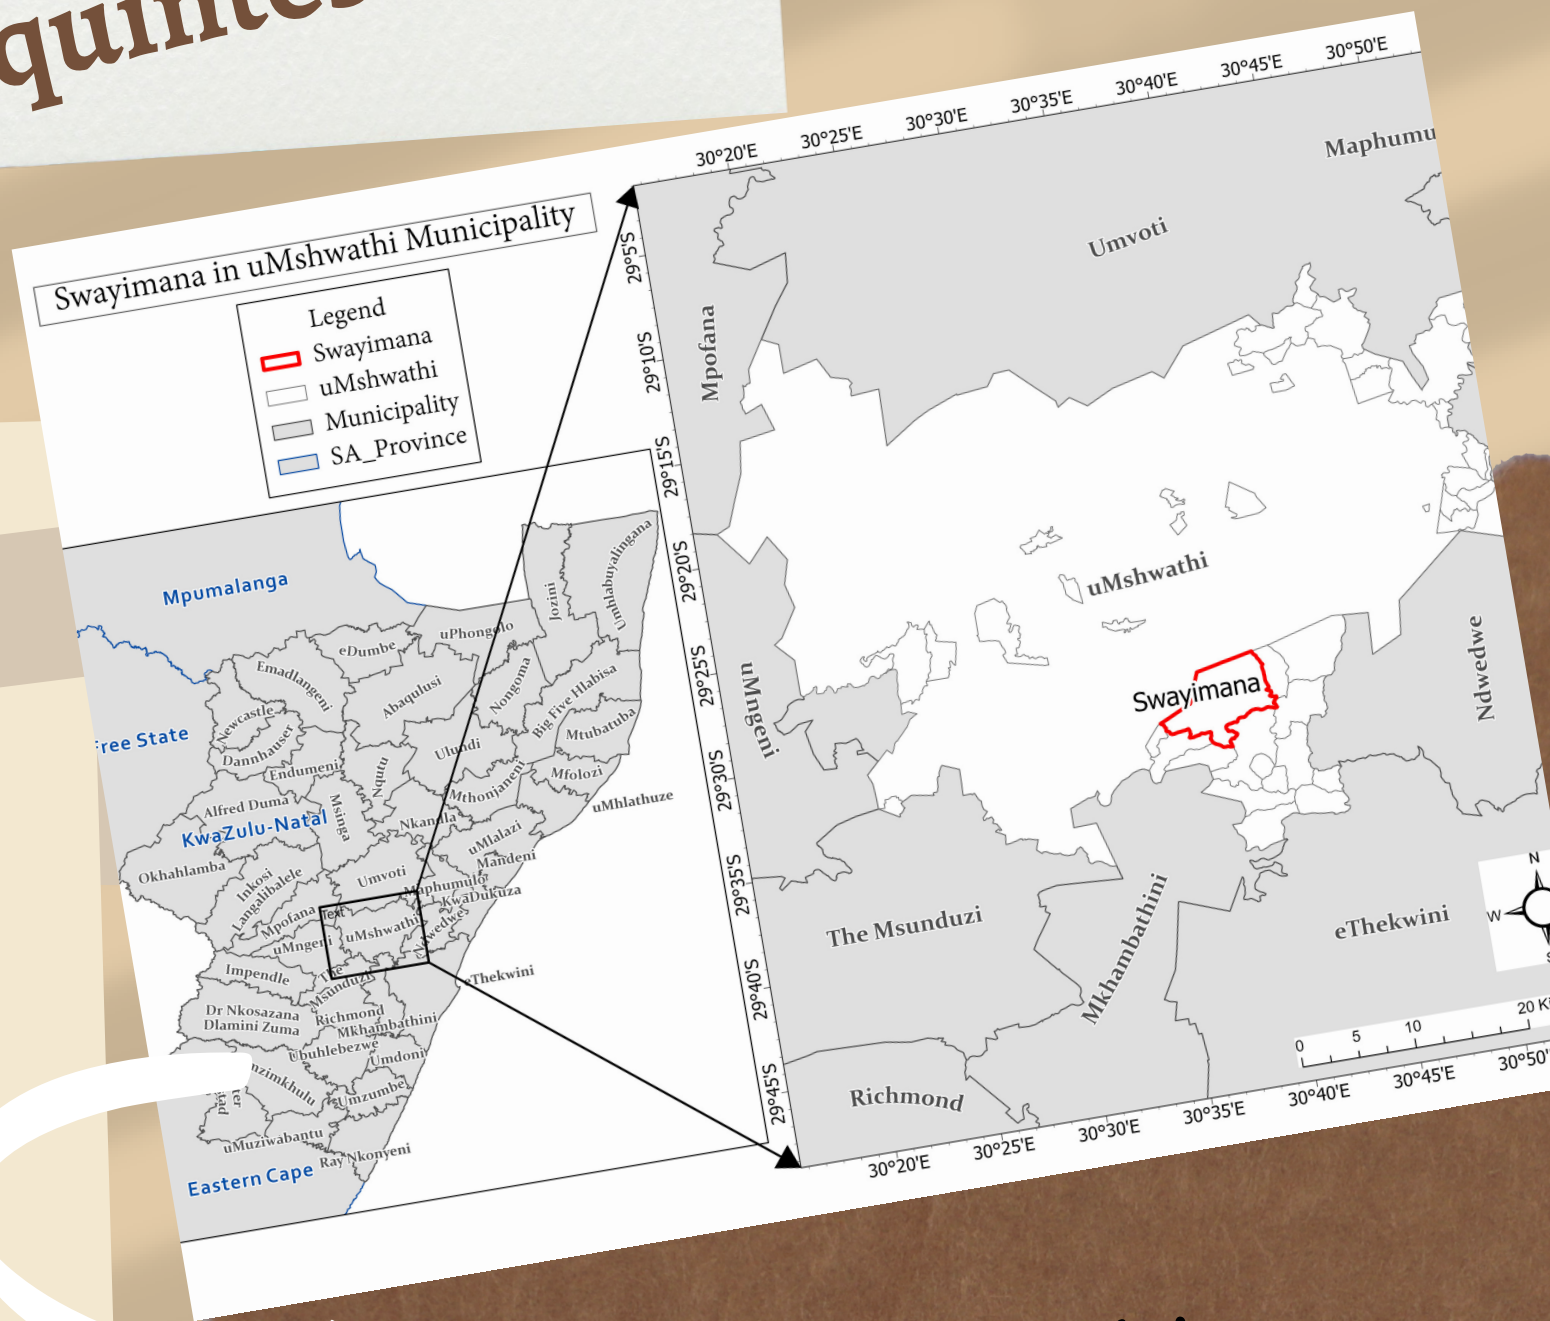

About me

I am an aspiring spatial scientist. Currently enrolled for Masters Degree in Geography with the University of Western Cape. Before then I obtained a Honours degree in Geography from University of the Free State. Born and bred in the misty mountains of Qwaqwa in the Free State.

The goal is to look back and say ‘I did all i could with the little that i had, anything else was beyond me’.

05/2022

My work!

In short, my work is to express answers to your problems in terms of location!

My current project, located in the above map, focuses on the use of drones on spatial quantification of maize water stress in smallholder farmers using drone captured data and machine learning algorithms. Ultimately, the results will reveal the potential and contribution of drone acquired data to estimate maize crop water stress at a field scale.
